YOUR VISION.
OUR POWERFUL
LE1700 TABLET PCs.

POWERFUL TECHNOLOGY. UNMATCHED PERFORMANCE. ULTIMATE MOBILITY.

LE1700 Tablet PCs from Motion Computing.[®]

DUAL BATTERY DESIGN

The hot-swappable Extended Battery gives you up to a full day of charge, and the warm-swappable Standard Battery provides several hours of reliable power.

Empower yourself with an option-packed LE1700 Tablet PC and experience innovative, cutting-edge mobile computing technology. The LE1700 combines a variety of high-end performance features and the power of the Intel® Core™ 2 Duo processor to provide the functionality you demand. With optional embedded wireless broadband and enhanced touch screen and handwriting capabilities, the LE1700 Tablet PC was designed to deliver.

WORK WITHOUT BOUNDARIES

The LE1700 Tablet PC integrates the latest innovations in ultra-mobile computing and offers a new level of wireless freedom with optional embedded wireless broadband technology. Field sales professionals can now access critical information and send handwritten emails, virtually anytime, anywhere.

With advanced connectivity and expansion features such as embedded Wi-Fi®, Bluetooth® and a Digital Video Interface (DVI-D) port, the LE1700 allows inspectors, appraisers and business professionals to instantly transform documents and presentations into engaging, interactive conversations.

Offering full functionality packaged in a lightweight, sleek design, LE1700 Tablet PCs come standard with a 12.1" high resolution SXGA+ display, bringing images to life with more color, more clarity and more detail than ever before. Motion's optional View Anywhere® display is perfect for working outdoors or in any lighting situation, ensuring optimum screen viewing wherever your business takes you. Mobile professionals, doctors, nurses and inspectors can now be productive in hallways, on rounds, at their desks and even in the field.

STREAMLINE YOUR WORK ENVIRONMENT

Weighing approximately 3 lbs., the LE1700 is lighter than most laptops and more efficient than pen and paper. Sales professionals can access their entire office with the touch of the screen, show customers real-time information and generate contracts to instantly close a sale.

When back at the office, place an LE1700 into Motion's full-featured FlexDock docking station for a complete desktop computing experience. The grab-and-go docking station, when combined with a keyboard, seamlessly converts your Tablet PC into a robust desktop system.

INCREASE YOUR EFFICIENCY

With advanced product reliability and a durable slate design, the LE1700 has the power to complete any task. Whether you are meeting with patients or conducting an inspection away from the office, LE1700 Tablet PCs deliver. Utilize the energy-efficient performance and power of the Intel Core 2 Duo processor to multi-task and speed up your workday. Move seamlessly from task to task without slowing down with advanced processor capabilities.

Offering up to a full day of battery life, the LE1700 Tablet PC can be configured to meet your specific battery life needs no matter what your job requires. Use Motion's Speak Anywhere® technology to dictate notes and communicate on the run, even in the noisiest environments. Worried about background noise? Configurable acoustic software cancels out what you don't want to record, so you can be productive wherever, whenever.

Connect anywhere. The comprehensive package of wireless technologies that the LE1700 offers, including embedded wireless broadband, enables ultimate productivity for inspectors and other field service professionals. If you work in a more traditional office setting, connect to hotspots using the integrated wireless LAN (802.11x).

MOTION FLEXDOCK

For a complete desktop system, combine the FlexDock docking station with the USB Keyboard and DVD-RW drive.

CHOOSE YOUR MODEL

Motion's LE1700 Tablet PC series offers two unique computing options to meet your mobile computing needs.

LE1700WT WITH WritETOUCH™ TECHNOLOGY

The LE1700WT with WriteTouch technology is the result of two powerful Tablet PCs working together as one. With the Intel Core 2 Duo processor, the LE1700WT brings a new level of performance to your workday. This powerful technology allows you to quickly switch between applications and effortlessly multi-task, without impacting your battery life.

Easily switch from touch screen to pen mode throughout your day. No matter what mode you choose, the LE1700WT allows you to continue to work seamlessly. Write a memo with the digitizer pen, then touch the screen to navigate to another application—without interruption. Motion Computing realizes that sometimes your work may demand the handwriting accuracy of pen input, and other times you may need the easy navigation of touching the screen with your finger.

LE1700 TABLET PC WITH STANDARD TABLET PC TECHNOLOGY

The LE1700 uses a digitizer pen for application input. This model easily converts handwriting to text, and is often used in environments where paper forms are being replaced. Tap your way through the web with the digitizer pen, access patient information while making rounds or wirelessly stream multimedia presentations on the large 12.1" display.

The LE1700 Tablet PC is a powerful tool for recording and presenting information. Healthcare practitioners can collaborate on patient cases and access electronic records at the patient's bedside. Mobile professionals can now dictate notes, use voice commands to navigate or record information, even on the run.

SECURE YOUR DATA

LE1700 Tablet PCs offer the latest security advancements to protect your system. Experience advanced security that shields you from unauthorized access, guards your data and controls usage in high-security environments. In the event of a sudden drop or jolt, the integrated DataGuard™ shock sensor stops the LE1700 hard drive, protects your data and allows for data file recovery.

PROTECTIVE CASE

Extend the usability of your Tablet PC with extra protection from shock, bumps, water and dust.

The built-in Fingerprint Reader prevents unauthorized system use and enforces rights-based access to valuable network resources, ensuring an unmatched level of authentication. Offering higher security than software solutions alone, the embedded Trusted Platform Module (TPM) enables hardware-based encryption and safely protects your data. In high-security environments, restrict usage when necessary by easily disabling capabilities for WWAN, 802.11 and Bluetooth for greater control.

MOTION BUMP CASE

The Bump Case provides additional protection for your LE1700 when traveling or in the field.

LE1700 PRODUCT SPECIFICATIONS

ABOUT MOTION

Motion Computing is a mobile computing and wireless communications leader, combining world-class innovation and industry experience so professionals in vertical industries such as field sales and service, healthcare and government can use computing technology in new ways and places. Marketed through an experienced worldwide reseller network and directly through its website, each Motion product is built to customer specifications. The company's enhanced line of Tablet PCs, mobile clinical assistants and accessories are designed to increase productivity for on-the-go users while providing portability, security, power and versatility.
